GERMANY

**A BIG HIT FOR ALL
PREDATOR ANGLERS**

DISCOVER OUR NEW PREDATOR ROD RANGE!

Leaf through the following pages and get caught up in the enticing world of carp and catfish fishing – brought to you by SPORTEX. We've captured it all: the thrills and the spectacle of your favourite sport plus unique know-how and, of course, the best product innovations for the 2021 fishing season.

All pictures were taken in June 2020 and feature the prototypes of our new rods.

It is always an enormous pleasure to produce the SPORTEX catalogue for our followers. But it is also impossible to show our entire portfolio here. So please visit our website for more products and further details.

In addition to our latest catalogue, at www.sportex.de you will find the complete SPORTEX range – from rods and landing nets, to bags and clothing and various accessories. Thanks to the practical search function, you won't be fishing around for long; instead we'll direct you to the perfect product. Simply select your desired target fish and you'll be led to the most appropriate models alongside useful tips and tricks.

You can also register online for our 10-year blank guarantee – it's quick and easy. For useful tips about your new rod, please use the FAQs. And of course you can also quickly find your nearest SPORTEX dealer.

You should also know: we have a number of exciting videos featuring all the new products from a few very long and rewarding shooting days. Find them on our website, on our YouTube channel #SportexRods or on our Instagram account at sportex_germany

Nothing compares to a SPORTEX rod: they owe their legendary reputation to their unique innovative power combined with outstanding technology. Our products stand for absolute reliability, the highest possible quality and masterly craftsmanship, and they have been setting standards worldwide for more than 70 years.

Today we can proudly say that SPORTEX rods have shaped generations of anglers. But we believe progress never stops. You either ride the current or you get swept away with the tide. That's the SPORTEX way.

We are the benchmark in rod building! To this end we work every day with the very best materials, great craftsmanship, a special eye for detail... and a smile on our face. You can rely on it.

Your SPORTEX Team

Rod action

Extra Fast:

the blank primarily flexes in the upper third of the tip section. Further down the blank features a strong backbone.

- Sensitive bite detection
- Powerful and long distance casting

Fast:

the entire tip section of the blank flexes. The butt section offers a strong backbone.

- Sensitive bite detection
- Powerful and long distance casting

Medium Fast:

the rod flexes from its tip nearly down to the middle of the blank. The butt section offers a strong backbone

- controlled hook setting even on longer distance
- large distance casting possible

Medium:

the rod flexes from its tip all the way down to the middle of the blank. The butt section offers a strong backbone.

- controlled hook setting even on longer distance
- large distance casting possible

Slow Medium:

the blank flexes from its tip all the way down to just about the handle section.

- very healthy balance of power and best for fighting large fish
- excellent shock absorption even in close-up range

Slow:

the entire blank evenly flexes from its tip down to the handle and is quite soft.

- very healthy balance of power and best for fighting large fish
- excellent shock absorption even in close-up range

REVOLT SPIN

STIRS PREDATORS INTO ACTION.

Time for a spinning rod revolution. With its innovative heptacore blank, the Revolt Spin guarantees success on the water. Thanks to its precise casting, impressive sensitivity and immense power when playing the fish, even big fish will fear for their safety.

A smiling fisherman wearing a yellow and black cap with 'ORTEX TEAM' on it, a dark jacket, and a yellow shirt, is holding a large fish. He is also holding a fishing rod. The background is a blurred body of water and greenery.

BEYOND

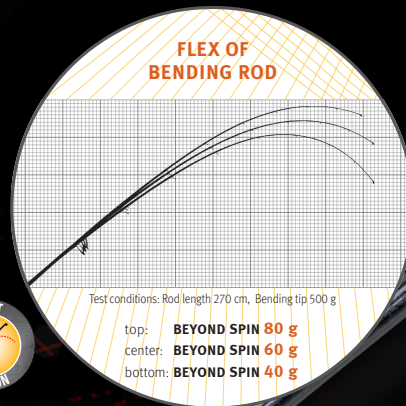

S P I N

MAKES EASY PREY OF BIG PREDATORS.

Expect eye-opening power from the tip to the grip. Thanks to its hexagonal carbon blank, this great spinning rod has a number of extraordinary capabilities such as outstanding casting dynamics, unique sensitivity and enormous power delivery. Pike, perch & co beware!

SPORTEX BEYOND

REVOLUTIONARY ROD SERIES WITH OUTSTANDING CAPABILITIES.

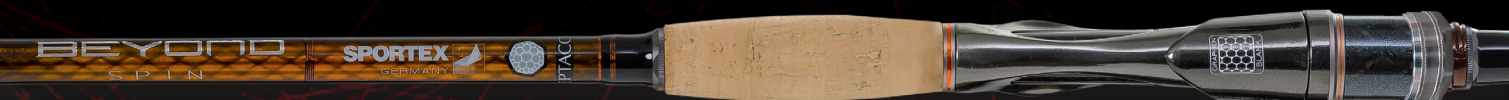

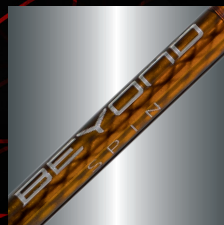

BEYOND SPIN

The blank has a semi-parabolic action and incredible speed. The unique heptagonal blank shape means that, when casting, the blank cannot veer to the left or the right. In other words, your bait is always exactly on target.

The Beyond Spin also makes no compromises when it comes to staying connected with the bait. Every contact with the bottom, every patch of weed and every bite is passed straight to the angler.

These unique rods make for simply sensational fishing.

ACTION

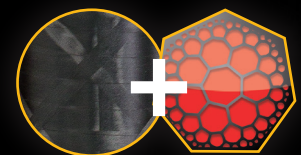

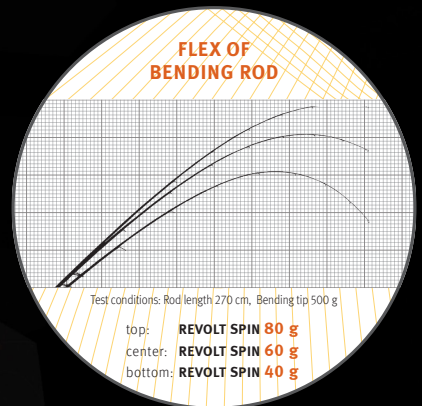

REVOLT SPIN

Just like their 'big brothers' in the BEYOND Spin Series, the Revolt Spin rods feature our trail-blazing 7-sided Heptacore blank. They also boast maximum possible speed, optimum loading/acceleration, extraordinarily good sensitivity and enormous reserves of power. Proof that they are genetically the same rods as the Beyond Spin models, only with a different configuration. Revolt Spin rods also feature SIC guides (K-Style), a specially finished FUJI TVS reel seat, a removable FUJI hook keeper, and ergonomically designed Duplon handles. All Seatrout models are fitted with a full-cork handle.

TECHNICAL INFORMATION

The game-changing Heptacore blank is built on T1000 carbon fibres and features a unique profile, which is heptagonal (seven-sided) instead of round like 99.99% of ALL rods. This complex advancement in blank construction represents a quantum leap in rod building and pushes the capacity of carbon beyond what anyone thought possible. Heptacore outperforms common blanks with round profiles by about +20% in casting performance and +15% in power.

GRAPHENON

SPIN

A POWER WEAPON THAT SPREADS EXCITEMENT.

The predator's nightmare has become a reality. Due to its unique blank construction of high-tech carbon and graphene, this innovative spinning rod makes no compromises – it boasts extreme lightness and maximum casting precision alongside deeply impressive dynamics in the fight.

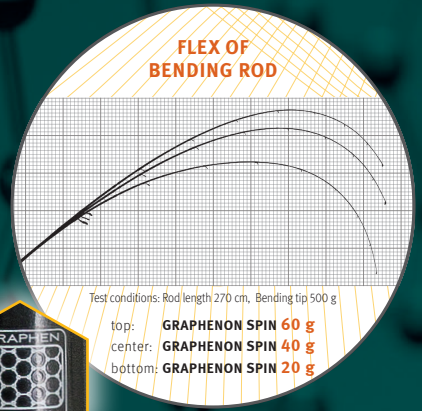

TIBORON **Extend**

THE ULTIMATE MANIPULATOR OF SHY PREDATORS

Precision, sensitivity and power loading combined: thanks to a newly developed blank made of nano-carbon fibres and graphene, the TiBoron Extend will inspire you with its outstanding casting performance, bait control and power. Fishing at the highest level has never been such fun.

SPORTEX GRAPHENON SPIN

THE ULTIMATE POWER COMBINATION OF HIGH-TECH CARBON AND GRAPHENE.

TECHNICAL INFORMATION

The name gives it away... alongside carbon, we also use graphene as a major component. Graphene is a carbon modification with a two-dimensional structure. Each carbon atom is surrounded by three others at an angle of 120°, which creates a honeycomb pattern. It has the highest tensile strength of any previously known material (e.g. 125 times higher than steel). The rod blanks contain around 20% graphene, which makes a massive contribution to load capacity, speed and casting performance.

GRAPHENON SPIN

The lightweight Graphenon Spin offers huge power deployment, good resistance when playing fish and long, precise casting. Add excellent bait 'feel' and sensitivity, together with a progressive action, and these rods make the perfect companion on the water.

The Ultra Light model is specially designed for very small lightweight baits. It comes with a super-sensitive tip that ensures every bite is transferred straight to the handle.

The rods in the series are fitted with FUJI-TVS reel seats, FUJI-KL /KT-SIC guides and tough, ergonomically-designed Duplon handles. The Seatrout models are fitted with full cork handles. This is our high-tech premium rod series – and everything you could ask for!

SPORTEX TIBORON EXTEND

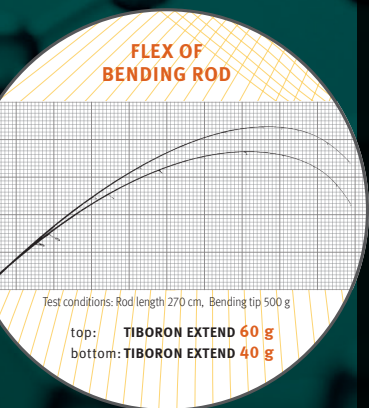

THE PERFECT COMPANION FOR MAXIMUM PLEASURE ON THE WATER.

TIBORON EXTEND

The newly developed blank, based on nano-carbon fibres combined with graphene, forms the core of the TiBoron range. The graphene technology gives the TiBoron immense speed and resilience yet the blank is very light, with exceptional loading properties when it comes to casting. The sensitivity of the blank is everything you could want, sending clear messages from the bait end right into the hands – which, in turn, means maximum control. The TiBoron Extend and ULR come fitted with an ergonomic 3K carbon handle, while the Classic version has a top quality split-cork handle. Other features include high quality SIC guides and a FUJI TVS reel seat. Both Seatrout models have a full-cork handle. A first class series of rods, for a first class experience on the water. Guaranteed.

SPORTEX AIR SPIN

A VERY LIGHT, FAST AND ELEGANT ROD.

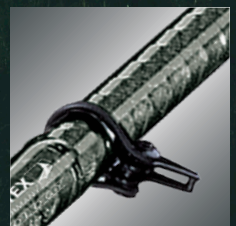

AIR SPIN

Very light, very fast, very fine: this exclusive series of rods features a combination of exquisite characteristics. At their core is the new Helicore blank, which is designed for maximum lightness. With its composite material of T800 carbon fibres and special epoxy resin with finest nanoparticles, it gives the Air Spin unequalled speed and stability. The ultra-light FUJI TORZITE guides with titanium frames amplify the feather-weight character and boost casting like no other guide available in the market. Added to this, the extra-ordinary loading capacities of the blanks mean that both, artificial and natural baits can be cast with extreme precision at long distances without any major effort. The sensitive blank provides radar-like control and passes even the slightest of takes right into your handle, whilst retaining unbelievable strength to handle the most explosive fight with superior ease. These rods - probably the lightest ones available - definitely donate an extraordinary fishing experience. The FUJI reel seats, a distinctive finish with the added touch of special varnish, and the high quality handles made of finest cork (sea trout) or Duplon round these outstanding premium rods off.

The advantages::

- very light blank with fast action
- Extremely long distance and precise casting
- Extraordinary sensitivity

SPORTEX ABSOLUT NT

AN ABSOLUTE MUST-HAVE FOR DEMANDING PREDATOR ANGLERS.

ABSOLUT NT

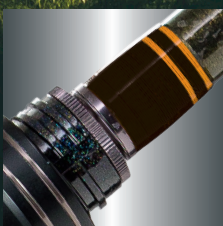

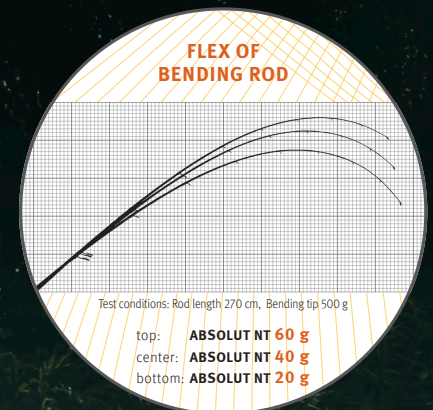

The challenge when developing the new Absolut NT was to revolutionise the excellent Helicore blank of the previous model. We spent a vast amount of time creating an extraordinary blank incorporating the very latest materials and technologies.

Nano-carbon fibres were woven in a special process and subjected to enormous pressure, so as to increase the tear resistance of the individual fibres. This in turn enabled us to produce an even more resistant Helicore blank for the Absolut NT.

This series is also characterised by its extremely light weight, speed, fine sensitivity and enormous power. Long casts, precise bait guidance, reliable bite indication and consistent striking action all contribute to the rod's excellent performance. Here is the perfect predator rod for anglers who want only the best.

The advantages:

- Long distance and precise casting
- Extraordinary sensitivity
- Enormous power

„The Genium Spin impresses with its uncompromising solid build: a perfect combination of lightness, strength and speed – and an absolute must for every carbon enthusiast!“

GENIUM SPIN

PRECISION TOOL THAT IS A PROVEN FISH-CATCHER

Slim, fast and extremely hard-wearing, this unique predator rod bristles with outstanding features – from the featherlight blank through to its super-fast action and its immense reserves of power for the fight. No predator can resist getting its teeth into this power generator!

SPORTEX GENIUM

A GENIUS ALL-ROUND ROD
FOR hardcore PREDATOR ANGLERS.

Sportex Carbon guides with SIC inlay

D-Hook Hook eye

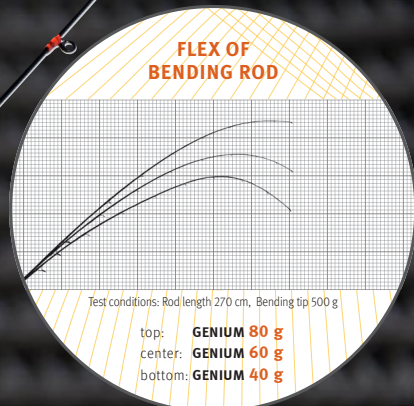

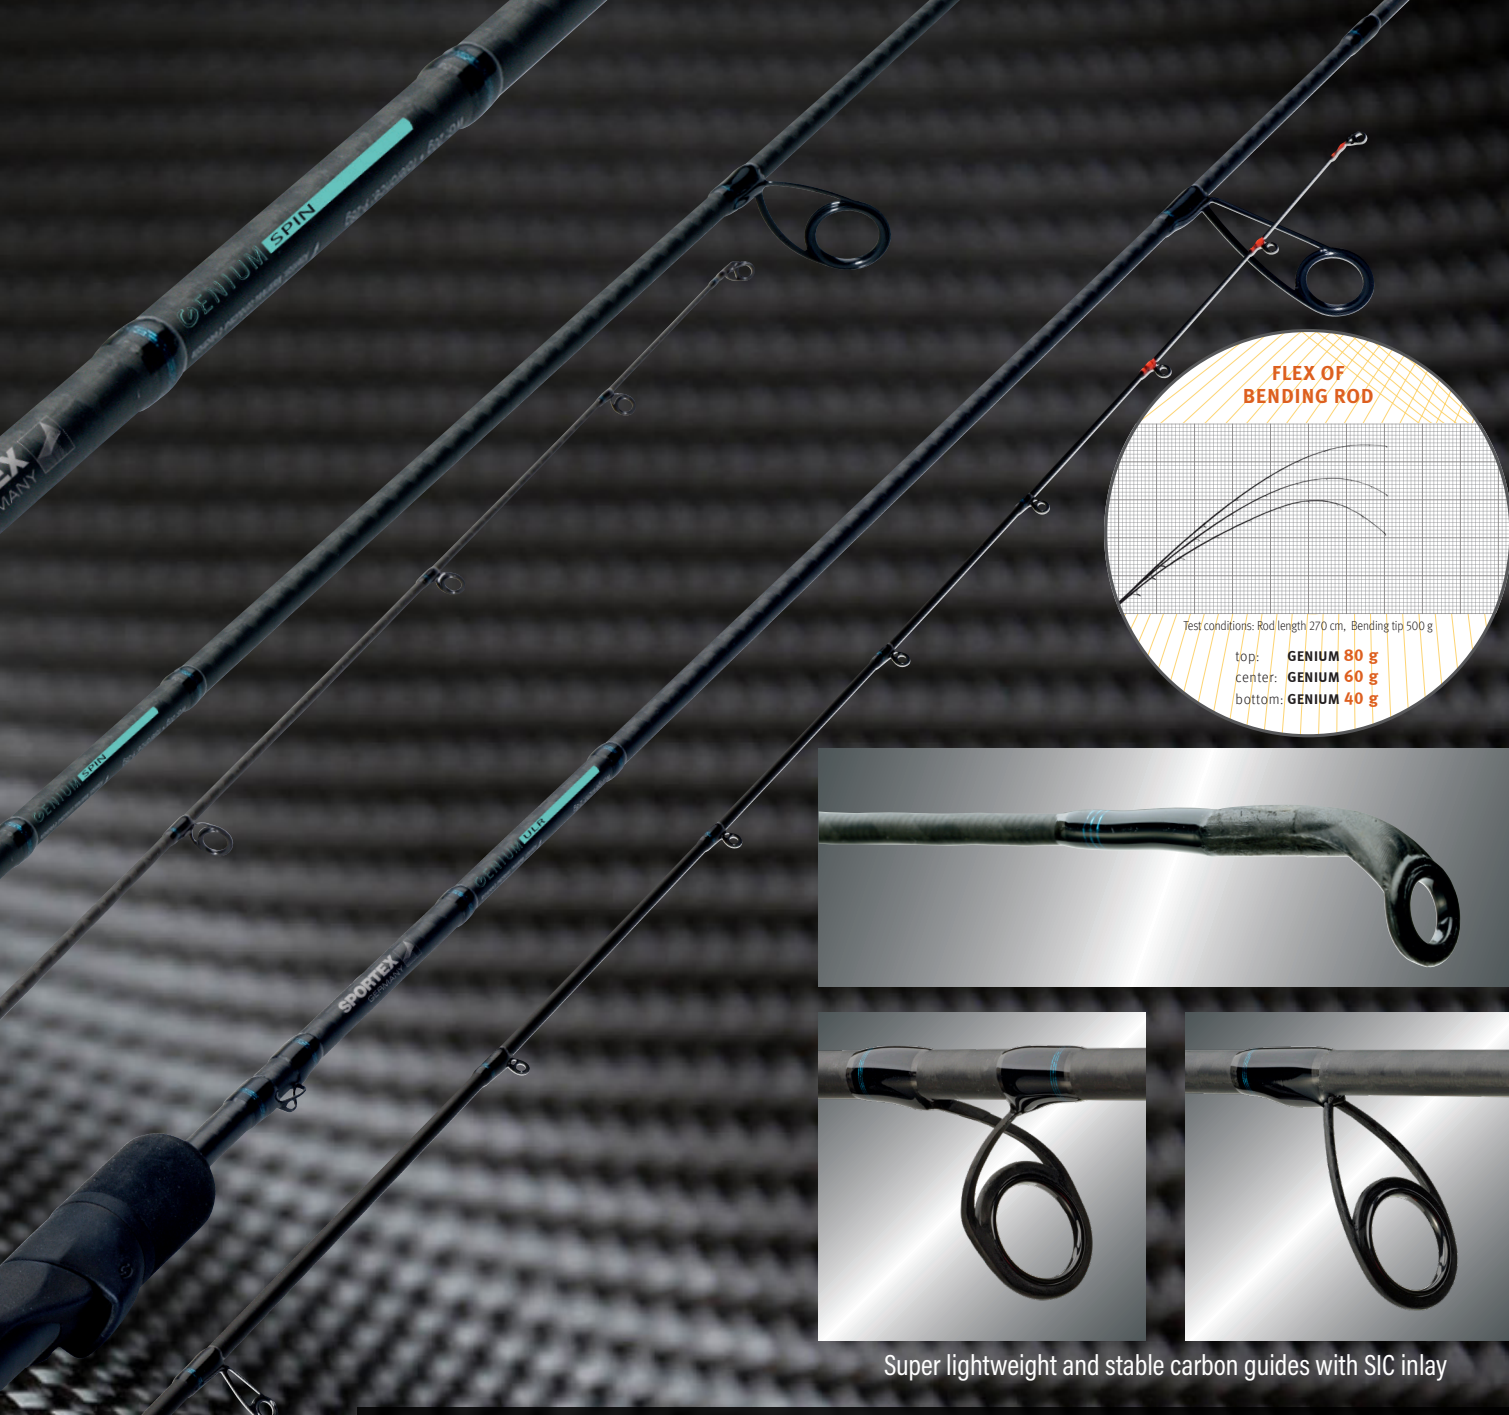

XSS R/S

GENIUM

Here is the complete rod for the ambitious spinning angler – with a touch of genius. When we developed the new Genium Spin series, our aim was to provide a spinning rod that was extremely thin, fast and tough. The result is a precision design that makes the pursuit of predator fish with wobblers, soft baits, blinkers or spinners a pure pleasure. The featherweight blank, made of top quality Japanese high-performance carbon, has a fast, semi-parabolic action and excellent loading characteristics that make it a gem to use.

Add to that, impressive casting capacities and immense reserves of power in the backbone, as well as outstandingly good damping ability and extraordinarily high sensitivity, and this rod has everything you could wish for when it comes to guiding the bait and sensing a bite. The technical and visual highlights include an ergonomically-shaped 3K split carbon handle and newly developed, extremely light, high-end carbon guides. All models come fitted with a super robust Seaguide XSS reel seat and the innovative Seaguide 'D-Hook' hook keeper.

Super lightweight and stable carbon guides with SIC inlay

Lasse Keinicke - Teamangler Predator
Denmark

„Thanks to its sensitive T1100 Helicore blank combined with extremely light carbon guides and a minimalist light-weight reel seat, for me, the NEOWAVE is in a league of its own.“

NEOWAVE

TRIGGERS A WAVE OF EXCITEMENT WHEN THE ACTION STARTS.

This fantastic ultra-light rod with an extremely slim blank and super sensitive tip weighs less than 80 grams – and still has more than enough power to easily put trout, perch or chub on the scales. The most fun an angler can have.

SPORTEX NEOWAVE

A LIGHTWEIGHT ROD
FOR TRUE FANS.

TITAN guides

lightweight cork R/S

NEOWAVE

This lightweight that makes a heavyweight impression. A bar of chocolate weighs about 100 grams. Our NEOWAVE tops the scales at a maximum of 78 grams. This unique series of rods takes the expression 'ultra light' to a whole new level – or rather, down to it. Developed especially for going after trout, perch and chub, it is a pure pleasure to fish with from the first second.

The use of our latest T1100 Helicore blank with special epoxy resin and nano-materials allows for the creation of a super-slim structure - without losing any of the reserves of strength. The incredibly sensitive neon tip immediately signals every bite. And at the same time, thanks to a handle section reinforced by innovative 4X Cross technology, the rod has enough power to tame big fish that fight back. Among the visual and technical highlights are the extremely light titan guides and the minimalist lightweight reel seat. And as well as all this, all models come fitted with a Seaguide D Hook hook keeper and robust handles made of top quality feather-light Duplon material. It's the perfect rod series for giving new meaning to the idea of having fun when playing fish.

Extra lightweight titanium guides

Romain Prouillac - Teamangler Predator France

„With its light, extremely fast blank and ergonomic carbon handle, the Carat GT-S is the ideal companion for successful predator hunting.“

***CARAT GT-S* »»»**

TOP-CLASS SPINNING ROD JEWEL WITH PERFECT FINISHING TOUCHES

An elegant power tool designed to inspire any angler. Thanks to its newly developed blank, the Carat GT-S shimmers with eye-opening speed, casting performance, sensitivity and power every time it's used on the water. It will put a glint in the eye of even the most demanding spinning enthusiast.

SPORTEX CARAT GT-S

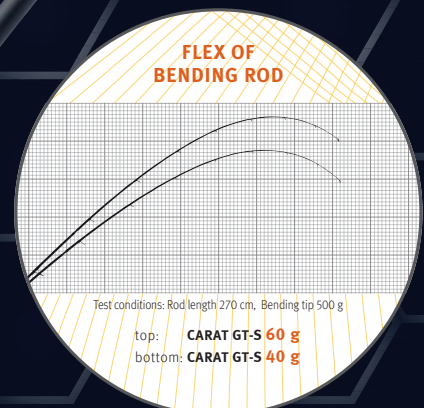

A VERY ELEGANT AND
LIGHT POWER TOOL.

CARAT GT-S

Fast, modern, and powerful - these are the key features of the completely upgraded Carat GT-S series. Thanks to the use of our latest T1100 Helicore blank, with special epoxy resin and nano-materials, these rods are even more impressive than the previous version, with better loading characteristics when it comes to long casts calling for real precision.

In addition, we have succeeded in improving the rod's fine sensitivity, with the tip immediately signalling every fish contact. Ergonomic 3K split handles round off the innovative appearance and, together with the fast action, guarantee extremely direct transfer of the bite right down to the handle. Other top quality features include Seaguide SIC guides in K style, a carbon DPS reel seat with FUJI hoods, and a Seaguide 'D-Hook' hook keeper. An extraordinary series of rods for scoring success on the water.

CARAT GT-S ULR

The perfect rod for finesse fishing with very lightweight baits for trout, perch and other species. The extremely fast and sensitive tip section transfers even the most cautious take – and makes sure the hook stays put. The short version is ideally suited for presenting the bait under overhanging branches on small streams.

CARAT GT-S SEATROUT - FINESSE

Our special rods with extra sensitive tip sections for successfully tackling sea trout. This model is exceptionally well-suited for using sbirulinos, bombardas floats or blinker spoons. Thanks to the special action of the blank, even fierce attempts to get away are brought entirely under control, avoiding unnecessary loss of fish. We developed the 'finesse' version particularly for fishing with thin lines and small, lightweight lures. Thanks to the filigree tip, trout swallow the lure without any worries, and that ups the catch quota! All Seatrout rods come with top quality natural cork handles and a practical length marker to measure the fish you land.

CARAT GT-S TRAVEL

The reliable companion for every predator angler. The key feature of this model is that you can fish it in two different lengths. When the last part but one is removed, the 3-metre rod becomes a compact 2.4-metre alternative. Despite the change in length, the two rods have almost identical actions.

Fuji R/S

BLACK ARROW G-3

The fully upgraded Black Arrow rod series makes a real impression with its pure elegance. Thanks to the use of our high-tech T800 Carbon blank, with special epoxy resin and nano-materials, we have been able to improve speed and sensitivity even further in comparison with its predecessor. What's more, the handle has been reinforced with the help of innovative 4X Cross technology. This gives the new Black Arrow enormous power when the fish is being played, and brings even hard-fighting specimens well under control. The increased reset capacity of the blank allows for long casts with absolute precision, and without major effort.

In addition to the already famous spin and ultralight models, there are now two Musky Baitcast models available. These have been developed especially for the needs of modern musky and pike fishing using large lures. Thanks to the powerful backbone, even big heavy lures such as Bull Dawgs can be cast for hour after hour.

The two new street fishing models are intended for use in urban settings, such as harbours, canals, narrow rivers and so on, where there is no room for compromise. For better handling they come with a telescopic, adjustable rear handle. The special Uptide models allow for continuous action with uninterrupted power transfer when playing the fish. It's the perfect rod for modern finesse techniques when going after trout, perch and similar species.

All Black Arrow G-3 models come fitted with particularly slim Seaguide SIC guides and robust FUJI VSS or ECS Baitcast reel seats. Other features include top quality ergonomic Duplon handles and an innovative Seaguide 'D-Hook' hook keeper. This is an extremely elegant rod series, perfectly matched to the needs of modern predator fishing.

KEV NITRO

The use of Japanese high-performance carbon in conjunction with innovative aramid fibres, has enabled us to develop an entirely new and unique series of rods with features way in excess of their predecessors. The resulting rods are ideal for modern pike fishing, with a semi-parabolic blank that is some 20 per cent faster, noticeably slimmer and considerably lighter. The newly-developed aramid fibres provide enormous tensile strength, something you can easily feel under high loading or on extreme acceleration. As well as this, thanks to modern HT cross-winding technology, the handle provides maximum stability for even more power when casting and playing fish. All KEV Nitro models come fitted with top quality Seaguide SIC guides, stable FUJI DPS reel seats and innovative Seaguide 'D-Hook' hook keepers. A series of rods with no compromise, delivering the confidence that comes with maximum power and resilience, even in extreme situations.

Christian Lang Jensen - Teamangler
Predator Denmark

"I didn't take any convincing the first time I held the Kev Nitro's light, slim blank - and it exceeded my expectations with its extreme power when casting and playing fish!"

KEV NITRO

SPORTEX COREGONUM

THE BIG HUNT FOR WHITEFISH STARTS HERE.

COREGONUM XTL

COREGONUM

When we were developing these two precision rods for successful whitefish fishing, we put the focus on creating extremely light, fast and sensitive models. This was why we used Japanese high-performance carbon for the blank, which allows for extreme loading and enormous speed, so as to be able to make a lightning-fast strike at any moment. Plus, the rods have the power needed to hold even fierce fighters, like char and sea trout, securely on the line. The top quality fittings include extremely light Minima guides, high quality cork handles and a robust DPS reel seat for the 2.1-metre version, or a slide reel seat for the 2.4-metre version for using a fixed spool reel or 'Wenderolle'. As well as this, the rods come with two extremely sensitive carbon fibre exchangeable tips, guaranteed to signal every bite. Every salmonid fisher's dream!

Peer Kustermann - Teamangler Predator Germany

„Thanks to its sensitive tip and immense reserves of power in the spine, this lightweight rod is perfectly designed for catching lake whitefish. It stops even big fish scaping and helps prevent hooks slipping out.“

SPORTEX X-ACT TROUT

DISTURBING THE PEACE FOR SALMONIDS EVERYWHERE.

X-ACT TROUT

Our lightweight answer to the needs of the purist in pursuit of trout, char, perch and similar species. To prevent any interruption in the outstanding performance of the blank, which is made of Japanese high-performance carbon, all non-essential fittings have been avoided. This ensures sensitive bite transfer that is absolutely unequalled. No matter how slight the contact with the bait, it gets passed immediately to the handle section. This makes for a faster strike, which in turn means a noticeably better catch quota. In addition, the acutely sensitive tip also conveys every movement of the blinker, spinner or wobbler. That means no more worries about whether the bait is running properly – you can simply feel it! The perfect balance of the rod lets you fish for hour after hour without any sign of tiring. Top quality features include a robust SKS-style reel seat and high performance KL/KT-style SIC guides. The absolute benchmark for anyone expecting to stand often and long in the water!

Christian Lang Jensen - Teamangler
Predator Denmark

„Less is often more and this feels like having the blank in your hand! That means mega transmission from the super sensitive tip alongside a strong backbone. Perfect for hunting trout, perch and more. Feel it!“

SPORTEX DUFFEL BAG

THIS ONE PUTS EVERY OTHER
RUCKSACK IN ITS POCKET!

DUFFEL BAG

The duffel bag is a backpack specially tailored to the needs of modern spin anglers. Four additional pockets, which can be attached in any combination using the click system, enable the angler to quickly and easily adapt to the particular situation on the water. For example, the cell phone pocket reliably protects your phone from rain while also allowing you to operate it without taking it out. Made from highly resilient TPU material, the duffel bag is very resistant to wear, kink and tear. The material is also waterproof and weatherproof. Available in two sizes (M and L), the duffel bag comes as a basic version without the additional pockets or as a full version including the expandable pockets. The shoulder straps can be stowed away in a back pocket and additional handles quickly transform the duffel bag into a travel bag for leisure.

Samuele Menegolo - Teamangler Predator Italy

„This duffel bag is my constant and indispensable companion on the waterfront, as I can react quickly and flexible to any situation.“
