

# QUANTUM®

**One giant leap in specialist fishing tackle!**

**Those who dedicate themselves completely to one discipline of angling  
have no time for average, allround equipment.**

**Quantum offers exactly the top quality tackle required.**

Every experienced angler knows that sophisticated techniques call for optimum equipment. Ability is a combination of experience and technique and requires the highest perfection in tackle.

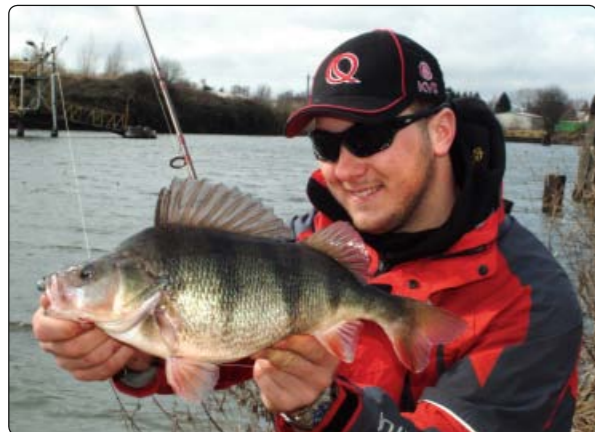

Quantum delivers the kind of equipment which leaves nothing to be desired – even for perfectionists. Product development consists of countless hours in research on the water, producing successful catch weights.

Quantum means rods, reels and accessories of ultimate quality – designed for reliability, durability and top performance.

The range is divided into three key segments:

- Specialist from page Q 3
- Sea from page Q 96
- Radical Carp from page Q 132

In each division specialists will find exactly the right equipment, tailored to their precise requirements. Tackle which always stands out above the rest thanks to the knowledge and experience of our engineers and test anglers.

# QUANTUM<sup>®</sup> SPECIALIST LIST

TRIED AND TESTED FOR SPECIALIST ANGLERS.

A specialist angler is fully committed to practising his "passion for angling" with one type of fish or technique in mind. That makes him a very demanding person. He is not satisfied with just any rod or reel. He wants the best tackle the market has to offer. Only then is he in a position to use all of his specialist knowledge and reap the reward with a fantastic catch and that does not always have to mean a gigantic specimen.

Quite often it is unusual circumstances which differentiate the specialist's catch from the ordinary pleasure angler. He succeeds where others have given up long ago. Trout and spinning anglers demand specialist equipment. They will find plenty of new and interesting items in the accessories area.

# EXO PT™ EXOSKELETAL DESIGN

Metal where it matters.™

## ADDITION BY SUBTRACTION.

Welcome to Generation Exo. Where we shoot conventional design full of holes. Where an exoskeletal aluminum frame sheds excess weight without sacrificing strength. And where mere ounces deliver a ton of fish-fighting performance.

"We can always make a good design better." That's the unwavering philosophy behind the Quantum® Performance Tuned® series. Because it's sweating the details and pushing the engineering that last 5% that makes all the difference. Reaching another 10 feet of casting distance. Trimming the last half ounce of weight. These refinements happen only when Quantum engineers question conventional wisdom to find a better way.

It's exactly this kind of thinking that led to the Quantum Exo PT™ products. We gave our engineers a simple challenge: design the lightest possible fishing gear without any sacrifice in performance. This prompted a revolution in reel design that in many ways is a very simple solution. We call it "Metal where it Matters". And it has yielded Quantum's first ever exoskeletal design and our lightest product ever. But that's just part of the story. Exo PT™ reels also make leaps forward in performance with some serious, industry-first innovation (that also happens to look pretty tricked-out). So join Generation Exo.

PT™ BAITCAST REELS & RODS

PT™ SPINNING REELS & RODS

EXOSKELETAL DESIGN

- EX4™ carbon-blanks
- FUJII® micro guides
- FUJII® reel seats
- Split-grip handles
- Custom actions

- Aluminium exo frame
- CSC™ drag system
- High-capacity spool
- PT™ bumper gears
- EVA handle knob

- Aluminium exo frame
- C4LF™ Carbon Rotor
- MAXCAST™ II spool
- Nickel-Titanium-bailarm
- TRU-BALANCE® handle

# EXO<sup>PT</sup>

Welcome to Generation Exo. Where addition is achieved by subtraction. Where a radically simple exoskeletal design sheds excess weight without sacrificing strength and performance. And where mere ounces feel like a ton of fish-fighting muscle. Welcome to the next generation of Quantum® Performance Tuned® – Exo PT™ reels.

## EXO ENGINEERING

"Metal Where it Matters". That's the thinking behind our exoskeletal hybrid construction. It combines a special, ultra-rigid aluminum alloy in load bearing areas with a lightweight composite that reduces weight in non-critical locations by 50%. This allows us to build the lightest possible frame with absolutely no sacrifice in strength. In fact, it's 38% stronger than magnesium and 6 times stronger than a graphite composite frame.

In short, we shaved weight from Exo PT™ reels every place we could afford for a difference you'll feel on the water. You'll fish stronger, longer with the sensitivity you need to detect the lightest of bites – and the rock solid performance and durability you demand when targeting trophy fish.

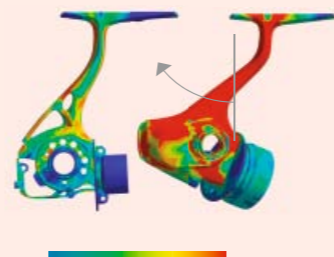

The Exo PT™ spinning reel rotor uses a revolutionary material from Quantum® called C4LF™. It's an exclusive polymer infused with long strands of carbon fiber. Most carbon-infused materials have carbon strands that are 2-3mm in length. Our C4LF™ carbon strands average 10mm in length. These longer strands align themselves in a much stronger matrix and result in a rotor design that's 2.6 times stronger than normal composites. This minimizes rotor arm flex under heavy drag loads while producing a design that's 80% lighter than our standard rotors.

C4LF™ raw material (at left) compared to standard carbon fiber material, showing the longer fiber length.

Through Finite Element modeling, we compared the effects of stress on aluminum and composite materials. Key areas like gear supports, bearings, and the spinning reel stem were analyzed to assure minimal flex under maximum load conditions.

## EXO STRENGTH

We subjected our Exo PT™ baitcast to a crush test in the Quantum® development lab (we don't expect this to ever happen to your reel, but our engineers like to torture our products in the name of progress). Exo withstood over 1700 lbs of downward force and continued to perform flawlessly. That means it can support over 4000 times its weight.

## EXO CRANKING PERFORMANCE

All Exo PT™ reels feature an aluminum drive gear that is ported to remove excess weight. Yet our special aluminum alloy can hold up under the toughest fish fighting conditions. And our 7.3:1 "Burner" baitcast gear set gobbles up an amazing 31 inches of line per turn of the handle with a smooth, vibration-free retrieve.

## EXO CAST CONTROL

Exo PT™ baitcast features a micro-sized version of our exclusive ACS™ cast control system. It offers a wide range of centrifugal drag settings that can be fine-tuned with the turn of a dial (easily accessed under a removable side cover). Factor in the low start-up inertia of our exoskeletal super light spool and it all adds up to longer casts.

## EXO CSC™ DRAG SYSTEM

Quantum's exclusive CSC™ drag system combines a series of carbon, stainless steel and ceramic disks for optimum drag performance. The carbon disks provide a friction surface that delivers high drag lockdown while maintaining smoothness. The ceramic disks have low start-up inertia and dissipate heat quickly on extended runs. The stainless disks impart the strength to keep the system in alignment under load. The results are an extremely smooth drag that can take the heat of any fishing situation.

## EXO DESIGN

Exo PT™ spinning's new Tru-Balance® handle design incorporates a one-piece 6061 tempered aluminum handle arm for maximum strength. The skeletal handle shaft has a unique rear leaning design to counterbalance the handle knob weight for vibration-free cranking. The comfortable EVA knob completes the featherlight design.

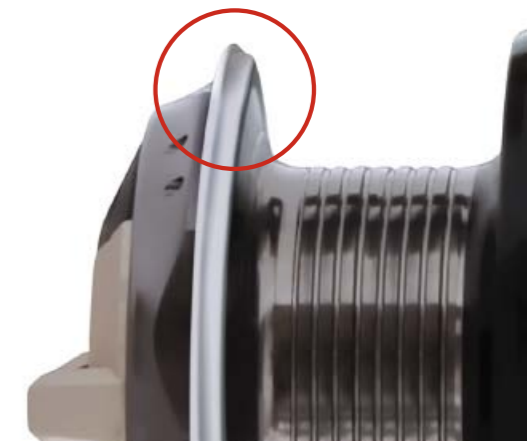

We use the same tempered aluminum for our skeletal baitcast handle. Contoured EVA grips add comfort and produce one of the lightest handles on the market.

## EXO CASTING PERFORMANCE

The lightweight spool on Exo PT™ spinning reels employs our MaxCast™II design. Greater casting performance is achieved by a variable oscillation system that lays line evenly on the spool.

The spool lip configuration is optimized for today's range of line types and smaller, more compact rod guides. The concave radius on the back of the lip prevents line from contacting the spool prior to the exit radius, creating less friction for longer casts. The system also keeps the line in tighter coils as it exits the spool to flow more freely and minimize backlashes and wind knots caused by looser coils. Our tests revealed a 10% increase in average casting distance over a standard spool lip design.

Combine this system with the micro guide set on our Exo PT™ rods and you have a deadly accurate, long-distance casting machine.

## PT™ BEARINGS

All Quantum® PT reels, including the Exo series, feature our custom-made PT bearings – the smoothest in the industry. They're made from high-grade stainless steel and feature a shielded polymer cage for durability.

## PT™ HOT SAUCE

Quantum® Hot Sauce™ is the industry standard in lubrication. The oil's viscosity levels yield a freer rotation of moving parts by molecularly bonding with the base metal. Our grease is made with exclusive tackifiers that hold to wear surfaces longer.

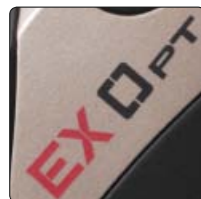

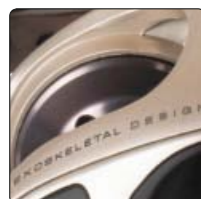

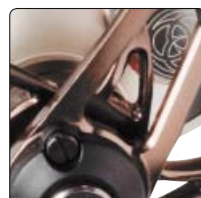

**EXO BAITCASTER**

We set our engineers the challenge of making the die Exo Baitcaster as light as they possibly could without compromising on performance. The solution was relatively simple: We called it "metal only where necessary". The finished product is a skeleton design and the lightest Quantum Baitcaster in the company's history. At the same time, the reel is so robust that you can drive a pick-up over it, as you can see on our web site. Available in left and right-hand versions.

**STANDARD FEATURES**

- 10 PT precision ball-bearings plus 1 needle bearing in stainless steel
- Aluminium skeleton housing
- Finely adjustable CSC™ drag system (carbon drag discs)
- Continuous anti-reverse
- ACS casting drag reliably prevents the line from overflowing
- Hardened PT gears
- Spool with high line capacity
- Ergonomic EVA handle knob

Exo 101 LH available from December 2012

**EXO SPINNING**

Dream high-end spinning reel with breathtakingly light weight. The skeleton design delivers unparalleled rigidity combined with outstanding functionality. Now available in the five most popular sizes. From the cute size 15 for trout anglers through to the fully grown pike and salmon model in size 50. Multi-award winner at trade fairs for its performance and design. The generation Exo has been conceived for the new generation of ambitious spinning anglers for whom only the best is good enough.

**STANDARD FEATURES**

- 10 PT precision ball-bearings plus 1 needle bearing in stainless steel
- Aluminium skeleton housing
- Over-sized perforated aluminium Long Stroke™ spool
- Rotor in C4LF™ Carbon
- Nickel-titanium bail arm
- TRU-BALANCE® handle
- Finely adjustable CSC™ front drag system (carbon drag discs)
- Continuous anti-reverse
- Large line guide with anti-twist system
- Foot Forward™ reel foot for better rod balance
- Two-speed oscillation system
- Titanium nitride line roller

#15 available from October 2012  
#40-50 available from February 2013

**SMOKE**

The Quantum Smoke is the first Quantum reel beside the Exo with a skeleton design following the principle "Metal where it matters". This has enabled us to dramatically reduce the weight of the reel without making even the slightest compromise in terms of rigidity. The size 25 Smoke weighs just 213 grams, which is a good 100 grams less (!) than our predecessor models in the same market and price segment. The reel continues the tradition of a metal body which is robust while ensuring an ultra-smooth gear action. Wherever metal has had to be used it has been used, but in a weight-optimised form – the housing as a shell component looks like Swiss cheese with milled out sections only where possible. On the other hand, metal has been replaced where possible with modern composite materials. The rotor is made from a composite of a plastic used in space travel and long carbon fibres (approx. 10 mm), which is extremely difficult to process but achieves incredible rigidity.

The Smoke also impresses with its particularly light, unusually shaped and thus balanced handle arm as well as with its multi-disc carbon front drag that can create up to 20 lb of drag pressure; most unusual for a reel of this size. The Max Cast spool edge design also reduces line friction on the front edge, significantly increasing casting distances.

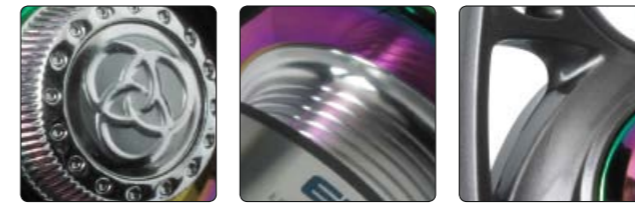

#40 available from February 2013

**STANDARD FEATURES**

- Ultra-light aluminium body
- Rotor in C4LF fibre composite (with embedded long carbon fibres)
- 10 stainless steel precision ball-bearings
- Continuous anti-reverse
- Aluminium PT Long Stroke™ spool
- Large-surface multi-disc front drag system with carbon discs
- Extremely light handle in aluminium with EVA knob, 100% wobble-free as screws out and does not fold
- Foot Forward™ reel foot for better rod balance
- Unbreakable and unbendable bail arm in ultra-light nickel-titanium material
- Titanium-nitride-coated line guide with anti-twist system.

**STANDARD FEATURES**

- Robust aluminium body
- 10 stainless steel precision ball-bearings
- Continuous anti-reverse
- Aluminium PT Long Stroke™ spool
- Large-surface multi-disc front drag system with carbon discs
- 100% wobble-free aluminium handle, which screws out but does not fold
- Foot Forward™ reel foot for better rod balance
- Unbreakable and unbendable bail arm in ultra-light nickel-titanium material
- Titanium-nitride-coated line guide with anti-twist system.

**ENERGY PTI**

Our popular Energy Pti has also benefited from the evolution in reel design that has emerged from development of the Exo and the Smoke. The technology, which is tried and trusted down to its basic elements, has now been packed into a considerably lighter housing. In arduous routine testing, the Energy PTI demonstrated time and again that 'light' can also mean 'robust'. Anglers who are not constantly obsessed by the latest trend will appreciate this elegant reel as an ideal compromise between performance, robustness and affordability.

**CATALYST**

The Catalyst owes its heritage to the Catalyst Inshore that was part of our range until 2011. Countless anglers were impressed with the reel's ultra-smooth gear action and are sure to be equally taken with this model. For ultra-light tackle anglers, we are delighted to offer a size 10 version. There are four models in total, leaving even demanding spinning anglers spoiled for choice.

**STANDARD FEATURES**

- 10 stainless steel precision ball-bearings
- 11 ball-bearings #40
- Continuous anti-reverse
- Aluminium Long Stroke™ spool
- Large-surface multi-disc front drag system with carbon discs
- Titanium-nitride-coated line guide with anti-twist system.
- Foot Forward™ reel foot for better rod balance
- Exclusive TiMag™ system: Maintenance-free magnetic bail-arm folding system
- Unbreakable and unbendable bail arm in ultra-light nickel-titanium material

**BLU PT**

Anglers specifically wanting to go spinning in salt water will need a reel designed to withstand the particular demands of the sea. In the Blu PT, we offer a model optimised for salt-water-resistance. However, this does not mean we have made any compromises on the usual features of a modern spinning reel, from the supremely light weight and ultra-smooth gear action to the high-performance drag.

**STANDARD FEATURES**

- 9 stainless steel precision ball-bearings
- Continuous anti-reverse
- Aluminium Long Stroke™ spool
- Large-surface multi-disc front drag system with carbon discs
- Ergonomic handle knob
- 100% wobble-free aluminium handle, which screws out but does not fold
- Large line guide with anti-twist system
- Foot Forward™ reel foot for better rod balance
- Unbreakable and unbendable bail arm in ultra-light nickel-titanium material
- Gears made from a super-hard stainless steel alloy
- Saltguard multi-layer housing coating

**SALSA**

A dream high-performance spinning reel with metal housing, finished with the lowest production tolerances for optimal smooth action and long service life. Since these reels are mostly used with the thinnest diameter braid, e.g. for drop-shot fishing, with rubber fish or for twitching, we have produced them in a luxuriant finish and with no fewer than 8 ball-bearings. The S-curve system ensures good line distribution.

**STANDARD FEATURES**

- 7 precision ball-bearings in stainless steel plus 1 needle bearing
- Ultra-slim housing with no visible screws
- Continuous anti-reverse
- Perforated aluminium Long Stroke™ spool
- Large-surface multi-disc front drag system
- CNC stainless steel handle
- Thick bail for optimal balance
- Large line guide with anti-twist system
- Two-speed oscillation system
- Spare spool
- Titanium nitride line roller

**ESCALADE SPIN**

An affordable front-drag reel from Quantum. Slender housing, reinforced with aluminium side plates. US Quantum reel technology for entry level. Classic all-round spinning reel range for all spinning techniques, from light trout fishing to rubber fish sport and spoon fishing for pike and salmon.

**STANDARD FEATURES**

- 4 precision ball-bearings and 1 needle bearing
- Super-slim housing with aluminium side plates and metallic lacquer
- Continuous anti-reverse
- Perforated aluminium Long Stroke™ spool
- Large-surface multi-disc front drag system
- Stainless steel handle
- Large line guide with anti-twist system
- Foot Forward™ reel foot for better rod balance
- Two-speed oscillation system
- Finely adjustable front drag
- Titanium nitride line roller

CODE

Affordable front-drag reel with plastic body in customary Quantum design, enhanced with metallic finish. Naturally, with repeatedly requested design features such as Long Stroke spool and continuous anti-reverse. The extremely low production tolerances for this price segment also mean a very long service life.

STANDARD FEATURES

- 6 precision ball-bearings
- Super-slim housing with metallic lacquer
- Continuous anti-reverse
- Aluminium Long Stroke™ spool
- Large-surface multi-disc front drag system
- Quick-fold handle
- Thick bail for optimal balance
- Large line guide with anti-twist system
- Two-speed oscillation system

TENACITY<sup>2</sup>

An outstanding reel series in the Quantum range, which we expanded to four sizes owing to its huge popularity. The reels impress with their pleasant gear action and slender design. With 8 ball bearings, an aluminium spool and continuous anti-reverse, the reel has unbelievable high-class features for the price segment.

STANDARD FEATURES

- 8 precision ball-bearings and 1 needle bearing
- Ultra-slim housing
- Continuous anti-reverse
- Perforated aluminium Long Stroke™ spool
- Large-surface multi-disc front drag system
- Stainless steel handle with EVA handle knob
- Large line guide with anti-twist system
- Two-speed oscillation system
- Titanium nitride line roller

**ANTIX RD**

Rear-drag reels are still widely popular for spinning. With its contemporary look and numerous attractive features, this silky smooth Antix RD is bound to make an instant impression. And, despite the soft action, the reel delivers sufficient power to bring even strong opponents to their knees.

**STANDARD FEATURES**

- 4 precision ball-bearings and 1 needle bearing
- Continuous anti-reverse
- Aluminium Long Stroke™ spool
- Multi-disc rear-drag system
- Thick bail for optimal balance
- Large line guide with anti-twist system
- Two-speed oscillation system
- Spare spool
- Titanium nitride line roller

**Q VEX**

Brand new, top class Quantum spinning reel at an attractive price. Soft actioned smooth drag and perfect line lay – what more could you want? Available in the most popular sizes for freshwater spinning. Whether fishing vertically with a size 10 'mini-reel', or using wobblers for pike with the size 40 fighting machine – the Q Vex is always a reliable partner.

**STANDARD FEATURES**

- 9+1 ball bearings
- Cold forged anodised aluminium spool
- Continuous anti-reverse
- S-curve line distribution
- Robust nylon housing
- Powerful multi-disc front drag system
- CNC metal reel handle
- Balanced rotor with over-sized titanium nitride line roller

SMOKE LH

Similarly to the Exo reels, the technology used in these has also been borrowed by the Smoke baitcaster to drastically reduce the weight of the reel. The key is the skeleton design! A quantum leap to optimise the angler's comfort while enjoying his sport. With a Smoke, the angler can continue to focus on his fishing while his fishing colleagues using other reels will have long since tired!

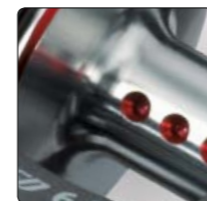

ACCURIST LH

Between the top baitcasters and entry-level versions there is an increasing demand for models in the high-performance bracket. The Accurist ticks all the boxes. Many professionals and countless leisure anglers in the USA swear by Quantum baitcasters. And there are an ever-increasing number of fans in Europe.

STANDARD FEATURES

- CNC-machined aluminium housing frame and side elements
- MaxCast ultra-light skeleton spool
- CSC ceramic drag system
- 6 polymer stainless steel ball-bearings

EXO SPIN US BAITCAST

EXO US SPINNING

Available from January 2013

SMOKE SPIN 

Available from January 2013

SMOKE SPIN VERTICAL 

**EXO**  
EXOSKELETAL DESIGN

**EXO SPIN US BAITCAST & EXO US SPINNING**

Exo PT™ rods feature EX4™ construction which provides lightweight sensitivity without sacrificing durability. This results in a lighter and thinner blank with exceptional performance. The Fuji® reel seats are 54% lighter than conventional seats and the Fuji® Alconite™ micro guides are 84% lighter and help to improve castability and increase sensitivity.

**KEY FEATURES**

- EX4™ carbon blanks
- Fuji® Micro Guides
- FUJII® reel seats
- split-grip handles
- custom actions

Fuji® Micro Guides on both casting and spinning models

**SMOKE SPIN**

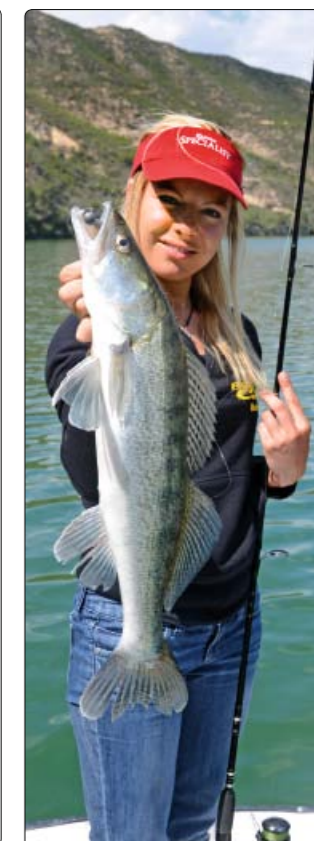

Visually, the Smoke Spin series is slender and elegant. However, anybody who holds these rods in their hand will appreciate what they are made of – possibly the best spinning rods available on the market! The powerful, super-slim blanks leave nothing to be desired and deliver pure pleasure when fishing. Even long-range strikes and fights with monster specimens are handled masterfully by the Smoke Spin. The Smoke Spin, a spinning rod that may become addictive!

**SMOKE VERTICAL**

Just like its big sister, the Smoke Vertical is bound to make the heart of every spinning angler beat faster. The phenomenal blank transmits every movement to the lure and ensures even cautious bites are felt through the handle. The perfect partner when it comes to vertical fishing for predators.

HAYAI PITCH

YASASII VERTICAL

Supplied with high quality embroidered Cordura transport tube.

TOGARASHI BASS

KONICHIWA SHOT

Rated "Commended" at EFTTEX 2009!

**HAYAI PITCH**

Super fast spinning rod for ultra light perch and trout sport. The ultra light blank with pronounced tip action also has enough power in reserve to tame larger species such as pike or zander. Precise casting and lightning fast striking are the hallmarks of the Hayai Pitch; an ideal partner for small and inaccessible waters.

**YASASII VERTICAL**

Perhaps the first vertical rod ever from a "Japanese forge". The stiff but light blank detects absolutely everything from the bait touching bottom to every nudge of the bait by a zander – no rod could be more precise. The finished product draws on the inspiration of our own angling team and has already accounted for numerous specimen zander. One piece for maximum power in proximity duels under the boat.

**TOGARASHI BASS**

The fashion for light baitcasting sport continues to gain popularity. Quantum extends its baitcaster rod range with a model of the highest quality: a light blank with not too sensitive a tip action – ideal for casting and retrieving wobblers. The tip is somewhat firmer than the Yasasii Twitch, lending the rod an overall smoother action and living up to the demands of a baitcaster.

**KONICHIWA SHOT**

A simply incredible rod: the ultrasensitive yet firm tip conveys every movement of the bait directly to the angler with every vibration of the lure resonating up to the handle. The stiff backbone leaves nothing to be desired and reliably hooks any fish that lunges for the lure. This is the full-contact variant of a light lure rod – bait control that cannot be bettered. Ideal for boat sport, from the belly boat and for all fans of short rods for fishing from the bank.

ゆうわく YUWAKU RODS

Nil Satis Nisi Optimum is a Latin phrase that means „nothing but the best is good enough“. The spinning rods with the finest hallmarks of quality. Highly modular, carbon-fibre blanks from Japan, exclusively designed for this range of specialist Quantum rods with super-light blanks and extremely fast action. All of this is combined with components, such as the Fuji reel holder and rings, designed to stand up to the toughest demands. The ideal partner for spinning anglers who value maximum quality in rod design, bait control and fight enjoyment.

IRASSHAI JERK

Somewhat longer and more sensitive than the Irashai Jerk H, the Irashai Jerk is the optimal partner for jerkbait sport with medium-sized and large baits. A light and ultra-fast blank with tip action means fatigue-free fishing for hours on end. Finished as a two piece model for simple transport.

IRASSHAI JERK H

Specimen hunting for pike is no game of chance. Big baits catch big fish. And this jerk rod has been designed for the toughest tests. A one piece model with an ultra light yet strong blank, the rod is ideal for using large jerks, swim baits, wobblers and giant twisters that normal spinning equipment could not cast or retrieve. Top quality components ensure optimum durability of equipment in this high-impact end of the angling spectrum.

KENKI SPIN

The only longer rod in the Yuwaku range. With its sensitive tip and softer action, this all-round spinning rod is simply unstoppable: equally at home with small spinners, rubber fish or wobblers. Despite the sensitive tip, the quick blank has enough in reserve to defeat large specimens with ease.

YASASII TWITCH

The Yasasii Twitch has been specifically designed for ultra light fishing for perch with small suspender wobblers and soft jerks. The sensitive tip, combined with ultra fast action brings any wobbler to life in such a way even reluctant perch cannot resist. Absolutely lethal in spawning season when combined with small lures such as the Hot Toddy. The light blank guarantees fatigue-free fishing with an emphasis on fun.

CRYPTON SHOTGUN VOL 2

CRYPTON SHOTGUN VOL 2

CRYPTON SHOTGUN VOL 2

**CRYPTON SHOTGUN**

A revised bestseller of previous years with improved gradation of lengths and casting weights. From the light spinning rod with fast action and stiff backbone to the powerful pike and zander model - and all in one series!

All of the rods share an outstanding tip action for precise bite detection and accurate bait presentation. The slender blanks are particularly impressive and have to be experienced rather than merely seen to appreciate their true potential.

HYPERCAST PRO TOUR SPIN

HYPERCAST PRO TOUR ZANDER

HYPERCAST PRO TOUR JIG

**HYPERCAST PRO TOUR SPIN**

Modern spinning rods in an attractive price category. The sleek blank surprised testers time and time again with its liveliness. The actions are tailored to the requirements, as indicated by American Pro-Tour spinning anglers for example. Why not benefit from the know how of experienced pros?

**HYPERCAST PRO TOUR ZANDER**

Another special rod in the Quantum range. Specially conceived for zander sport from the boat with lures and natural baits. The quick action allows the angler to place rubber baits and deadbaits on the system with precision and to feel bites straight away.

**HYPERCAST PRO TOUR JIG**

Slightly overlooked these days, yet Jig rods with a fine tip are still essentially modern. Used principally with small twisters, these rods enable optimal bait control and bite indication. The Pro Tour Jig comes in two lengths.

ESCALADE POWER JERK

ESCALADE JERK

ESCALADE TWITCH

ESCALADE VERTICAL

ESCALADE DROP SHOT

ESCALADE POWER TWITCH

All rods

**ESCALADE JERK & POWER JERK**

Jerking can often produce brutal bites. And that means pure adrenaline! What the angler needs is uncompromising equipment with optimal quality and functionality. The Escalade Jerk & Power Jerk impress on both counts meaning beginners and pros alike will not want to put these rods down. Both versions come with a trigger handle making them perfect for use with baitcasters and multipliers.

**ESCALADE TWITCH**

Twitching with artificial lures can rescue many a lean day's fishing by tempting wary predators out of their hides. In the Escalade Twitch, the Quantum experts have developed an outstanding rod for this increasingly popular angling method. The rod displays its full potential with small to medium-sized lures. A must-have for every spinning angler!

**ESCALADE VERTICAL**

A fantastic little rod for vertical fishing. Our testers were instantly impressed by the Escalade Vertical as practically no other vertical rod combines so much sensitivity with such power reserves in a fight! Even the most cautious bites can be detected and converted with a deft strike.

**ESCALADE DROP SHOT**

It is no longer a secret that drop shot fishing can produce successful results. However, this specialist method requires specialist rods. These rods must indicate cautious bites but provide sufficient backbone when the fish has taken the bait. The Escalade Drop Shot ticks every box. Available in 2.1 m and 2.4 m lengths to suit different preferences.

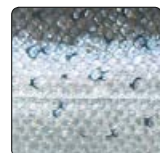

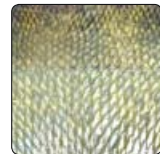

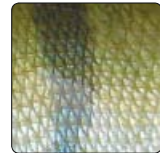

**ESCALADE POWER TWITCH**

Twitching and jerking are becoming increasingly popular but not all anglers opt to fish with baitcaster reels. That is why we have developed the Escalade Power Twitch. Wobblers and jerkbaits of up to 100g can be cast out and retrieved effortlessly without having to cast aside the fixed-spool reel.

MAGIC PERCH

MAGIC ZANDER

MAGIC PIKE

MAGIC SEA TROUT

MAGIC COD

**MAGIC PERCH**

Anybody looking for a specialist perch rod is sure to fall in love with the Magic Perch series. The slender, sensitive blanks are optimally tailored to light spinning and set new standards in this price segment. A visual highlight is the perch design, which could not be more realistic.

**MAGIC ZANDER**

An outstanding rod series for light to medium rubber fish angling for prickly predators. The rods impress with their fast action, excellent price-performance ratio and natural-looking zander design, which is a real eye-catcher! We are confident the Magic Zander will prove hugely popular with both beginners and seasoned zander anglers.

**MAGIC PIKE**

When it comes to hunting monster pike, there is simply no place for delicate rods. The equipment has to really deliver whether on the cast, when retrieving the bait and especially in a fight. The stylish Magic Pike Design and unbeatable price are sure to make these rods absolute bestsellers!

**MAGIC SEA TROUT**

Sea trout anglers trying their luck for these sought after coastal gems are an increasingly common sight on beaches today. The key is often to cast the spoon or Sbirolino far enough to reach the fish. What the angler needs is a casting machine like the Magic Sea Trout! Available in two different versions with attractive sea trout design.

**MAGIC COD**

Baltic Sea cod fishing continues to enjoy great popularity, whether from a small boat or cutter – pirking and jigging are widespread. And with our Magic Cod rod series, you have nothing to fear from the larger specimens. On the contrary, these rods have sufficient power to reliably bring monster specimens to the surface. Also available in a 345-cm-long cutter version by popular demand.

SMART RAZOR SPIN

SMART VAIRON MANIÉ

SMART STEELHEAD SPIN

**SMART RAZOR SPIN**

Good rods often cost a lot of money, but beginners and occasional anglers often don't want to dig too deeply into their pockets. And now they don't have to because our developers have succeeded in creating a razor-sharp rod series that covers all aspects of spinning without breaking the bank. Perch, zander, pike and similar are in for more than a close shave with the Smart Razor.

**SMART RAZOR VAIRON MANIE**

Vairon Manie rods were originally developed for deadbait fishing for trout. But this three-piece spinning rod is a real all-rounder! The rod copes masterfully with light to medium-sized spinners and is incredibly versatile.

**SMART RAZOR STEELHEAD SPIN**

The Steelhead Spin from the Smart Razor series is a price crusher in the sea trout rod category. The price-performance ratio is mind-boggling, offering an outstanding shore spinning rod at little expense. The Smart Razor Steelhead Spin takes you a big step closer to the fish of 1,000 casts!

**HYPERCAST FREEZER**

One-piece rod for ice-fishing. The extremely thin and sensitive blank makes winter angling a pleasure.

**TETON TROUT II**

Ultra light spinning rod for trout and perch spinning with an extremely thin blank. The action of the Teton Trout is semi-progressive making it ideal for trout fishing. The flexible blank will comfortably withstand the most critical situations in fights with energetic trout.

**JOKER ROD**

The new Joker rod has been specially adapted for the requirements of fishing with joker on the hook. Key characteristics of the rod are casting precision and maximum sensitivity in terms of bite indication, all packaged in a modern design. On the tip section, the rings are whipped closely together, while the special cut-outs in the handle ensure excellent contact with the blank. The extraordinary construction material, with particularly high reset force and low weight, make this rod like a rubber catapult that still feels feather-light in the hand, even after many hours fishing.

**HYPERCAST FELCHE**

A range of rods with pronounced, ultra-light and extremely sensitive tip actions. Originally designed for "Hegene" fishing for whitefish in Switzerland, Austria and South Germany which demands fast actioned but very sensitive rods, these rod are perfect for ultra light bait fishing for UK perch and real "fun" fishing for trout.

SMART VAIRON MANIE

HYPERCAST TELE PACK **FULL CORK HANDLE**

SMART ADJUST

SMART PACK ADJUST

All rods

**SMART VAIRON MANIE**

A feather light 3 piece trout rod in high modulus carbon. Well balanced with backbone throughout the entire blank. A rod that is simply fun and well suited for use with the smallest dead baits.

**HYPERCAST TELE PACK**

Incredibly small, easy to store and perfect for those occasions when you need a small to medium sized spinning rod when on the move. However, none of the sensitive action is sacrificed in the compact design. The ultra light blank delivers precise bait presentation, even in windy, weedy streams.

**SMART ADJUST**

Finally, continuously adjustable telescopic rods are now offered at affordable prices to cater for the occasional anglers. The Smart Adjust offers trout fans a balanced rod in various lengths with a sensitive tip which is particularly popular with our test anglers.

All rods

**MAGIC TROUT TELE SBIRO**

Attractive telescopic for use on trout lakes and other waters for casting out Spirolinos behind a bait. The high proportion of HM carbon fibres ensures outstanding rod balance and sensitive bite indication in the tip. In the unmistakable Magic Trout design. Available in two lengths, each with a casting weight of approx. 30 grams.

**MAGIC TROUT TELE DISTANCE SBIRO**

When it comes to punching out Spirolinos and other floats over large distances, anglers will appreciate the extra power of the Magic Trout Tele Distance Sbiro. The blank possesses incredible speed allowing optimal charging. Available in two lengths, each with a casting weight of approx. 30 grams.

**MAGIC TROUT TELE**

A high-quality range of conventional telescopic with short sections for trout fishing. All-round rods – perfectly suited to legering and float fishing. With its excellently balanced blank, the Magic Trout Tele is also an outstanding partner for spinning. The two shorter models are optimally suited to this type of sport while the longer version is more in the mould of a classic float road. Thanks to the through action, almost no fish are lost when playing.

MAGIC TROUT 30

MAGIC TROUT 55

MAGIC TROUT SPIN 40

MAGIC TROUT WAGGLER

**MAGIC TROUT 30**

Ambitious trout lake anglers crave three-piece rods resembling match rods. Such a design guarantees optimal action as well as classic casting properties. The high proportion of HM carbon fibres ensures outstanding rod balance and sensitive bite indication in the tip. The angler can fish for hours with this rod without tiring.

**MAGIC TROUT 55**

On trout lakes stocked with larger specimens, anglers will quickly appreciate the backbone of the Magic Trout 55 series. Not only can you enjoy more control during a fight, but larger floats and weights can be catapulted out towards the fish. And yet this powerhouse sits balanced in the hand thanks to the expensive HM carbon fibres in the blank.

**MAGIC TROUT SPIN 25**

Trout are ideal targets for artificial baits. Spinning rods are not only called for on natural streams, an actively retrieved lure can often produce stunning results on trout lakes when natural baits and trout dough fail to produce the bites. The Magic Trout Spin 25 series is specially designed for use with light spinners and the smallest wobblers.

**MAGIC TROUT SPIN 40**

When slightly larger spinners, rubber fish or deep-diving wobblers are required for trout spinning, the Magic Trout Spin 40 series comes into its own. The HM carbon-fibre blanks have ample backbone yet impress with their light weight and incredible resilience that will absorb even furious trout runs during a fight. The longest model is even suited to fishing for sea trout.

**MAGIC TROUT WAGGLER**

On trout lakes the aim is often to make as little noise as possible. Heavy Sbirolinos and bubble floats have no place whatsoever and casting out light floats and Sbiros the required distance needs the right rod. This is where the Magic Trout Waggler comes into its own! This feather-light rod can whip even small weights over huge distances, while its power makes fights with trout fantastic fun. The ideal plaything for ambitious trout lake anglers.

**QUATTRON PT**

Quattron has been a firm favourite with anglers for years. Many thousands trust this monofilament which enjoys an unquestioned place at the top of the line market. Incredibly, our product developers have even managed to improve the formula yet again to produce an even more capable Quattron. The Quattron PT (PT = Performance Tuned) is the ultimate monofilament, without rival in terms of strength, wear resistance, knot strength, durability and so on.

You can rely implicitly on Quattron PT. Countless tests testify to that fact. The line has received the EFTTA (European Fishing Tackle Manufacturer Association) seal of approval, which confirms the correctness of the stated performance parameters.

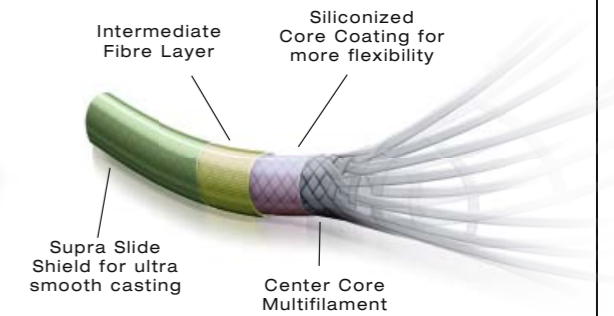

And in line with our policy of complete openness towards the customer, we are one of few manufacturers to state the true line diameter to three decimal places. Test it for yourself and be amazed.

**QUATTRON PT SUPER BRAID**

To satisfy the requests of countless anglers, Quattron PT monofilament is joined by a similarly outstanding braided line. Quattron PTI Super Braid is no ordinary braid line. Rather, it is a tightly plaited cord which is additionally coated to create a perfect symbiosis of braid and monofilament. Consequently, the strength and low-stretch properties of a top braid are combined with the excellent angling qualities of a traditional fishing line. Wave tangles goodbye! It is difficult to conceive a better solution for predator and sea fishing in the long term.

### TROLLING SALSA

At last, we have made the highly successful red line available for the big game market. The line itself is stiffer than the normal Salsa which is important in tropical temperatures. Outstanding durability and knot strength. Spool sizes have been designed to match the normal capacity of trolling reels.

### QUATTRON FC

An indispensable leader particularly suited for sea fishing. In the clear, light flooded sea water, even clear nylon lines can betray themselves with their varying refraction index. Quattron FC is made from fluorocarbon and has almost the same refraction index, remaining invisible to even the shiest quarry.

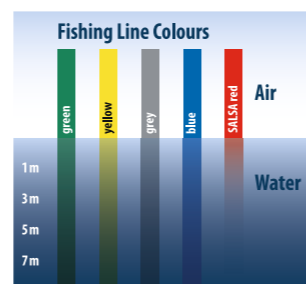

Quattron FC is not only coated with fluorocarbon, it is made completely from it! Uncompromising quality from Quantum.

### QUATTRON SALSA

Transparent red line with outstanding qualities. The red coloration, which makes the line easy to identify and recognise above the water for the angler, disappears at a depth of 1.3m. The line is then invisible to fish. The Salsa is also highly resistant to friction and a true workhorse, especially for sea fishing and trolling. Available in economic 250g spools with high capacity.

| CODE                         | Ø       | BS      | BS      | LENGTH |

### QUATTRON LOW STRETCH

Special surface treated monofilament which is almost halfway between ordinary monofilament and braid. Retains the benefits of monofilament with nicely reduced elasticity. Ideal for methods such as drop shot angling.

## YUWAKU-WOBBLER

With the Yuwaku wobbler range, Quantum is at the forefront of the new baitcast trend and presents twelve different wobbler types with the highest hallmarks in quality for light perch, zander, asp and pike sport. The wobblers are decorated with holographic colours of the highest quality for optimum natural effect while the action is sufficiently vibrant to stand out from the mass of fry. Now successful spinning is no longer restricted to the colder months when prey are thinner on the ground and predators are tempted by the lure. These baits also catch in the height of summer when the sun is shining and the water warm enough to swim in. Super sharp hooks, robust snap rings and diving blades come as standard, meaning the wobblers can catch countless fish without losing their attraction.

Diving Depth  
0.5 - 1.5 m

# ゆうわく

## JIFFY

Wobbler with a high frequency, unique action and small oscillations of the body. At its best when twitched, lurching alluringly to the side. Even perch are tempted by this wobbler on days when bites are at a premium. Action: floating

| SIZE | WEIGHT | AYU SHINER | HOLO CARASSIUS | STEALTH PERCH | BABY BASS | BLOOD DIAMOND | ASPIUS HUNTER |
|------|--------|------------|----------------|---------------|-----------|---------------|---------------|
| 5 cm | 4 g    | 3323 001   | 3323 002       | 3323 003      | 3323 004  | 3323 005      | 3323 006      |

# ゆうわく

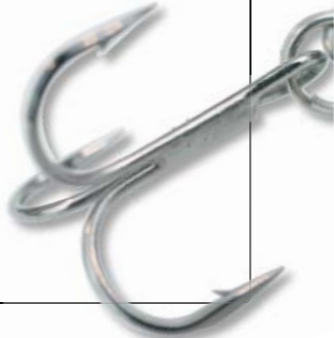

## JANKY

The Janky has a highly pronounced action with sweeping movements to the side. Light twitching produces a tantalising and chaotic action underwater; particularly alluring to predators in the warmer months. Action: floating

| SIZE | WEIGHT | AYU SHINER | HOLO CARASSIUS | STEALTH PERCH | BABY BASS | BLOOD DIAMOND | ASPIUS HUNTER |
|------|--------|------------|----------------|---------------|-----------|---------------|---------------|
| 5 cm | 5 g    | 3324 001   | 3324 002       | 3324 003      | 3324 004  | 3324 005      | 3324 006      |

# ゆうわく

## BELL BOY

A riotous lure for fishing close to the surface for pike and asp. Two-piece and with a small double bell on the end, a slow retrieve of the lure is enough to provoke spectacular surface takes. Action: swimming

# ゆうわく

## SNUGLER

With its long diving blade, a veritable deep diver that vibrates so strongly you can feel it in the rod handle. Retrieved close to the bottom, an exceptional lure for zander and large perch. On sunny days in particular, deep lying zander simply cannot resist the holographic colours. Action: swimming

| SIZE | WEIGHT | AYU SHINER | HOLO CARASSIUS | STEALTH PERCH | BABY BASS | BLOOD DIAMOND | ASPIUS HUNTER |
|------|--------|------------|----------------|---------------|-----------|---------------|---------------|
| 7 cm | 9 g    | 3325 001   | 3325 002       | 3325 003      | 3325 004  | 3325 005      | 3325 006      |

Diving Depth  
1 - 2 m

# ゆうわく

## HOT TODDY

The smallest jerkbait in the world! At 4 cm, an outstanding perch and asp lure with excellent casting qualities despite the small size. Flicks to the left and right with subtle jerks of the rod, imitating small fry to perfection. In short pauses between jerks, the lure sinks horizontally and before wiggling on - you simply have to see it in action!

Important: use this bait on light tackle and do not use large connectors or thick steel traces which will inhibit lure movement. Action: sinking

| SIZE | WEIGHT | LITTLE TAIMEN | AYU POINTED | BABY PERCH | MAG. STEELHEAD | YELLOW FIN | HOT TIGER |
|------|--------|---------------|-------------|------------|----------------|------------|-----------|
| 4 cm | 3 g    | 3326 001      | 3326 002    | 3326 003   | 3326 004       | 3326 005   | 3326 006  |

**ゆうわく** 

**TABLE DANCER · SWIMMING**

The Table Dancer is the entrant into the Yuwaku range. At just 7.5 cm in length the lure is no giant, but the fish landed with this "impish" surface lure are all the larger for it! Large perch have found this glider particularly irresistible as it jerks left and right when retrieved on the surface in a 'walking the dog' style!

Diving Depth 0 m

**ゆうわく** 

**TROUT SQUAD · SINKING**

Modern multi-jointed swimbait whose many individual segments create a stunning, natural swimming action. With its fast-sinking properties, it is ideally suited for a three-dimensional exploration of a water. The range of colours of the different designs has been specially selected by the Quantum team anglers. From "natural" to "aggressive", there is always the right option for every situation and type of water. With the trebles, we have opted for ultra-sharp designs in fashionable black nickel colour for a secure hooking.

Including two spare tails

| 17 cm | 42 g   | 3204 101   | 3204 102 | 3204 103 | 3204 104      | 3204 105 | 3204 106 |

Diving Depth 0 m

**ゆうわく** 

**JERKFACE · SWIMMING**

A surface lure with the X factor. With the slightest twitches on the retrieve, the angler can reel in this lively glider in a 'walking the dog' style. Whether hunting pike or monster perch – the lure proved to have incredible attraction during testing and thoroughly impressed our team anglers. The Jerkface lures its prey with both its attention grabbing colours and extra-loud rattler balls, which are combined with solid spring rings and needle sharp trebles.

**ゆうわく** 

**DANCING JACK · SINKING**

Inspired by the development of the Trout Squad but with an additional special feature: The Dancing Jack behaves like a hard bait but actually comprises a quite special rubber compound which ensures that the predator suspects nothing when taking a bite. The soft consistency means that the fish holds the lure in its mouth for longer, giving the angler more time to strike and drastically reducing missed bites. The Dancing Jack has outstanding casting properties and wriggles alluringly through the water due to its segmented design. Even when the lure is sinking when the angler pauses the retrieve, the plummeting action incites specimen predators to bite.

| SIZE  | WEIGHT | TROUT    | DARK KNIGHT | POLAR    | JUNGLE   | LIMIE    |

**ゆうわく** 

Diving Depth 1-1.5 m

**GIPSY DIVER · FLOATING**

Flat-swimming, extremely agile, 10-cm wobbler. Primarily designed for pike and zander but also effective for trout and specimen perch. The small diving blade achieves retrieve depths of up to 1.5 m. This area just below the surface is a favoured patch of predators on the lookout for food.

| SIZE  | WEIGHT | GREENBACK | STRIPER  | GOLDIE   | BLUE DIVER | HOT BROWNIE | PERCH    |

**ゆうわく** 

Diving Depth -4.5 m

**FUNNY DIVER · FLOATING**

Modern predator wobbler with long diving blade and first-class action. The 10-cm-long lure seeks out hungry predators down to depths of 4.5 m, drawing them with its attractive decoration. With 11 different colours available, there will always be the right Crazy Driver for every situation.

| SIZE  | WEIGHT | SNOWY    | STRIPER  | GOLDIE   | BLUE DIVER | HOT BROWNIE | PERCH    | MINNOW   | LIMIE    | ICE FOX  | SILVER DANCER | MACCIATO |

**ゆうわく** 

Diving Depth -1.5 m

**PIKER · FLOATING**

The name says it all – the Piker has been designed with one fish in mind; Esox Lucius. The strong construction creates an attractive, powerful retrieve making the 12-cm and 18-g wobbler the perfect prey imitation. Phenomenal catches were recorded during testing with the flat retrieve at depths of up to 1.5 m particularly in the warm season. When foraging fish gather at the surface, the predators are seldom far away.

| SIZE  | WEIGHT | SNOWY    | STRIPER  | GOLDIE   | BLUE DIVER | HOT BROWNIE | INTRUDER | MINNOW   | LIMIE    | ICE FOX  | SILVER DANCER | MACCIATO |

**SPOOKY JERK**

What an extraordinary jerkbait! The perfect retrieve action and phenomenal designs make the spooky jerk unique and frighteningly effective. All colours are ghostly UV-active and stir up predators' blood! Even beginners can use this lure effortlessly and enjoy success. Both the floating and slow-sinking models are must-haves in every lure box. Let the spooking commence!

**THUNDER TAIL**

These excellent Twisters have a slow sinking behaviour. The tail does not wag too frantically, but still creates enormous pressure waves. Particularly successful from spring to autumn.

**FAT BOY**

The allround Twister in more ways than one. Casts extraordinary distances and creates strong pressure waves. The striking silhouette incites more aggressive attacks on the bite than slimmer twisters.

**SMELT-SHAD**

Innovative rubber fish in extremely realistic design to imitate a smelt. Even the fins match the original with the dorsal fin folding up and down tantalisingly with a slight pull, just like a real fish. You might assume that these fins would restrict the lure's casting properties but, in testing, our team anglers found that they actually stabilised the flight. Whether retrieved normally or jigged conventionally, it is fun to see this lure do its work in the water. The Smelt-Shad is available in 4 sizes and 7 designs. Whether perch, zander, pike, catfish or even cod – any predator will fall to the Smelt-Shad!

**DUDE WORM**

Innovative, latest generation no-action bait. The "Action-Cut" allows ambitious anglers to adapt the bait to the conditions at the water. The V-tail can be changed to a pin-tail with a single cut while the body can be shortened from 14 cm to 9 cm via the front head section. The Dude Worm is perfectly suitable for all modern angling methods such as jigging, vertical, dropshot, wacky, or Texas & Carolina rig. With its modern ribbed structure, it is also optimally suited to further enhancement with attractors of any kind. The ribs create a variety of impulses under the water, triggering the predator's bite reflex via its lateral line.

**SHAT'R TAIL**

The Shat'r Tail is perfectly suited to use on heavily over-fished waters. When tested on swims where other baits had stopped working, the Shat'r Tail often needed just a few casts before there was a healthy bend in the rod! The jerky movements of the Shat'r Tails provide a precise imitation of an injured fish. This exceptional lure produces the most aggressive takes from pike, zander, perch, cod and, in the 16cm version, even catfish. With its slender, aerodynamic design, the lure can be cast over huge distances – ideal when fishing from the bank.

**JOKER LURE**

The revolutionary Joker Lure truly lives up to its name. Like an ace up your sleeve at the poker table, this lure ensures the angler always has a trump card in the tackle box. When retrieving or jigging, the lure genuinely appears to be moving in reverse. With its unique design and weight distribution, the Joker almost moves backwards from its starting position, remaining in the predator's field of vision for far longer. The hazards of hanging branches, tree trunks and overhanging banks are consigned to the past with this predator magnet! Now you can target the swims other lures simply cannot reach!

**SLENDRY**

Slender rubber fish, as used by today's top anglers for zander, perch and trout, e.g. when drop-shot fishing. Made from an extremely soft rubber compound. With cast-in holographic eyes, glitter design and cast-in holo-foil, to provide a particularly natural fish-scale effect.

**BATTLE SHAD**

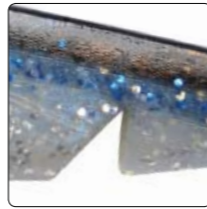

Our team angler Lars Vormelker drew upon his many years of experience working as an angling guide to develop this must-have lure: The special paddle tail that folds down in flight and slender body shape create first-class casting properties. Anglers fishing from the bank will particularly appreciate these features. With their intricately devised moulding material, the Battle Shads boast an incredibly alluring swimming action that will quickly strike fear into predators. The interesting lure sizes offer sensible options for the entire market from large pike down to perch.

**FREDDIE SHAD**

Revolutionary rubber fish with „action slot“: the deliberate cut in the rear third of the underside creates extreme movement on an upward retrieve. The forked tail and neat, hollowed-out channel on the upper side ensure optimal hook presentation. Our test anglers were unanimous. This is the best vertical lure, enabling casting and retrieval like a twister and with exceptional attraction! The smaller of the two sizes comes with a groove along the stomach for use with offset hooks (e.g. when dropshot fishing). Designed for clean placing of the hook with a dent at the mouth. Inventor and Quantum test angler Fredrik Harbort used the Freddie Shad to land zander up to 23 pounds even during testing.

**HAIRY MARY**

Innovative fringed jig in three sizes and eight highly attractive designs. The rubber compound impresses with its shimmering colours and extreme softness. At the leading edge of the Hairy Mary is a neat hollowed-out channel designed for optimal hook presentation. Both sizes come with a groove along the stomach for use with offset hooks (e.g. when dropshot fishing). Holographic eyes complete the alluring package. In testing, the Hairy Mary, with its partly contrasting, moving fringes, demonstrated its extreme attraction to perch and zander while the larger of the two designs proved a hit with pike.

**ARI'S PIN**

New Pin-Tail in three sizes and seven designs. Contrary to conventional "no action shads", the long and tapering tail emits erratic impulses when pulled or sinking. This has proven very successful not only in rivers but also in still waters and even in the sea. Thanks to the unique shape of the body the hook is unobstructed, so no bites are lost. The Pin Tail is not only ideally suited for jig fishing, but also for all modern methods like Dropshot, Caroliner rig or Texas rig fishing. Where others fail this shad only begins.

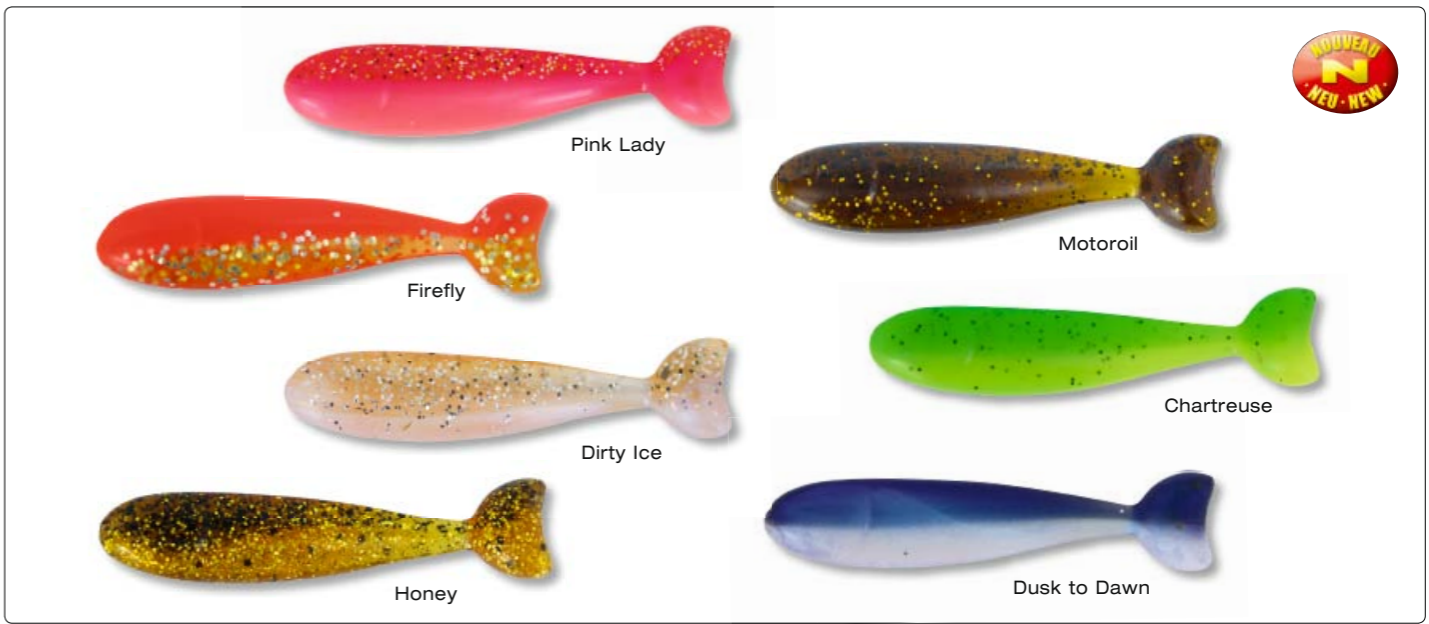

| SIZE   | PINK LADY | FIREFLY  | DIRTY ICE | MOTOROIL | HONEY    | CHARTREUSE | DUSK TO DAWN | Pcs./PACK |

**DANGLER**

Adorable little shad with small fins and excellent running performance even with very light jig heads. Especially during summer, when juvenile fish are on the move, it fits the prey pattern of our indigenous predators perfectly, which has been confirmed by our team anglers time and time again. The seven new designs imitate species like a goby, ruffe or a small whiting or come in shock colours, which are successful for trout.

| SIZE | PINK LADY | FIREFLY  | DIRTY ICE | MOTOROIL | HONEY    | CHARTREUSE | DUSK TO DAWN | Pcs./PACK |

**DIGGLER**

New, extra small hammer tail bait. This type of bait has been popular with Zander and Pike specialists for a long time. Now the Digglers with its 57mm length is also available for Trout, Bass and Chub. Especially in the summer months when the fries are still small these small hammer tails come into their own. Even with light jig heads the tail generates noticeable vibrations, which those predators simply cannot resist. A guaranteed success even in heavily fished waters thanks to the seven new colour patterns.

MAGIC TROUT

Deluxe trout floats and Sbirolinos "Made in Germany": These floats and Sbirolinos produced in original Rohazell® via a special manufacturing process are simply indestructible. The quality speaks for itself and is sure to impress ambitious trout anglers without exception.

MADE IN GERMANY

Our Warplane Sbirolino lives up to its name at the water – no other Sbirolino flies in such a straight line or as far as this precisely-balanced missile. The three different sinking properties cover the entire spectrum for trout lake fishing and are easily recognisable by their colour coding.

When you want to fish on the surface, you need our floater, waggler or trawler. When it comes to presenting the bait as inconspicuously as possible, there is simply no alternative to the floater. This sits on the water like a feather and does not spook even cautious trout. If the trout are located far away, the key word is "trawler!". The trawler can travel large distances effortlessly and is easily identifiable by its signal antenna. For all fans of loaded floats, our waggler is the perfect choice. The float is balanced incredibly accurately and indicates even the most tentative bites.

**MAGIC TROUT BAIT GLITTER**

Floating pastes are as synonymous with trout lake fishing as pizza is with Italy. So the Magic Trout Glitter doughs are sure to quickly find thousands of fans. The testers were immediately impressed with the doughs' excellent malleability, their durability, and not least their effectiveness: The brilliant colours and just the right amount of glitter flakes tempt even the wariest trout.

**MAGIC TROUT BAIT GLOW**

The Glow versions of the Magic Trout doughs come into their own in darker weather conditions as in winter, or for the increasingly popular night-fishing for trout on lake complexes. The luminescent paste is easily spotted by the fish and readily taken. Also outstanding on trout lakes with cloudy water or during algae blooms.

**MAGIC TROUT BAIT GLITTER/AROMA**

If the standard Magic Trout dough loses its lustre then try the Aroma versions. These doughs combine the already attractive standard recipe with ingenious combinations of attractants that leave behind an intensive trail of aromas in the water. So even fish a long distance away are drawn to the bait.

| CODE     | MODEL | TYPE    | COLOUR              | CONTENTS |

**SPECIALIST TROUT BAG**

Anglers heading to the trout lake often don't need an abundance of accessories. A few jars of paste, a handful of Sbirolinos, small accessories and the necessary equipment to care for the fish will generally suffice. Our Specialist Trout Bag can comfortably accommodate all of that and even has its own special compartments for paste and Sbirolinos. Now nothing should go missing.

TITANIUM LEADERS

Stainless Steel leaders are all well and good – but those who want the very best in tackle developments cannot ignore the unique properties of Titanium. Twisted or kinked leaders are a thing of the past. You couldn't damage these leaders even if you really tried! Long lasting so cost effective. Available either in a monofilament version or as 7-ply braid.

### WACKY HEAD

Intelligent weight head system for Wacky rigs, where the rubber worm is hooked to the side of the head and retrieved while twitching. The hook is passed through the worm such that it anchors the weight of the lead with its eye. At last, wacky rigs can be fished at long range.

| CODE     | WEIGHT | P/PACK |
|----------|--------|--------|
| 3183 001 | 3 g    | 5      |
| 3183 002 | 5 g    | 5      |

| 3183 005 | 12 g   | 3      |
| 3183 006 | 15 g   | 2      |

### JIG LEADS

Special jig leads for twister fans. These provide extra casting weight and remain immediately above the bait on the Texas and Carolina Rig due to their bell shape. Knocks against the adjacent bead to create a tempting ticking sound.

### SUPER FINE JIG HEAD

Extremely small and highly sharp jig hook with the smallest of heads. Suitable for a range of uses including perch, trout and chub sport as well as ice fishing.

### JIG HEADS

With a choice of round head or flattened sledge shape. Super sharp VMC hooks which hook the predator securely and do not bend even in the toughest fights.
